**POWERPLUS**<sup>®</sup>  
HIGH QUALITY TOOLS

# 100+

## DUAL POWER & GARDEN TOOLS

The Dual Power product range was developed with the DIYer in mind who's looking for eco-friendly, cordless and powerful. It offers 100+ power and garden tools that can be powered by the same 20 V or 2x20 V battery. Discover the extensive product range in this catalogue.

## 20V and 2x20V BATTERY RANGE

The platform consists of 2 battery types:

- 20 V: a standard battery pack which consists of 5 li-ion cells
- 2x20 V: a battery pack with double the amount of cells compared to the 20 V battery pack. In other words, one housing with 2 battery packs or 2x20 V.

The 2x20 V batteries fit all tools, no matter the amperage, and ensure an even longer working time when used on a 20 V tool. The 20 V batteries are only compatible with the 20 V tools.

## ONE CHARGER

The Dual Power charger was developed to be able to charge all Dual Power batteries quickly and efficiently. The batteries and chargers can be acquired separately or as part of a starter kit, as all Dual Power tools are compatible with this one battery platform. That makes Dual Power both economic and ecological because you won't need a different battery for each tool.

## **ONE PLATFORM, TWO RANGES, ENDLESS POSSIBILITIES**

Battery platforms have become increasingly popular as users save costs by no longer having to buy unnecessary batteries and chargers.

That is why Powerplus has developed a platform aimed to cover the majority of needs in the DIY and garden market. Go for cordless and powerful with the Dual Power line: an extensive range of durable, battery-powered power tools and garden tools.

The majority of battery platforms in the market can operate one specific range of tools, whereas Dual Power is designed to offer more flexibility and possibilities.

**One battery platform, two ranges of 20 V and 40 V power tools and garden tools.**

Depending on the project, your budget and the power needed, you will find the tool for you in the Dual Power range.

**DUAL POWER'S RANGE OF 100+ TOOLS NOT ONLY OFFERS ENDLESS POSSIBILITIES TO ANY DIY'ER OR PROFESSIONAL BUT ALSO PROVIDES THE FLEXIBILITY OF CORDLESS TOOLS.**

## BATTERY TECHNOLOGY

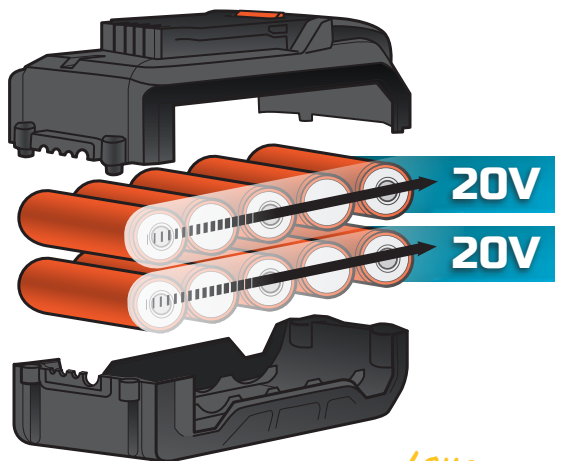

The higher the capacity, the longer a battery will run. The 20V battery has a capacity of 2000mAh, 3000mAh or 4000mAh. The 2x20V battery has a capacity of 2500 or 4000mAh when used on a 40V tool, but delivers an impressive 5000 or 8000mAh when combined with a 20V tool.

How is this possible? The 2x20V battery lends itself to both a series or parallel connection of its Li-ion cells. In a series connection (2x20V battery on 40V tool), each cell adds its voltage potential to obtain the double voltage of 2x20V. By connecting the Li-ion cells in parallel (2x20V battery on 20V tool), the result is an output with a double capacity: it will boost the capacity from 4000mAh to 8000mAh.

# BRUSHLESS MOTOR

## DISCOVER OUR EXTENSIVE RANGE OF BRUSHLESS TOOLS.

A brushless motor is a DC electric motor that functions without carbon brushes. Therefore it needs less maintenance, while having a longer lifespan.

The brushless motor extends the battery's runtime up to 50%.

Housing	Steel	Plastic	Plastic
Self-propelled	Yes	No	No
Brushless motor	Yes	Yes	Yes
Mulching function	Yes	No	No

The central cutting height adjustment is an easy and user-friendly way to change the lawnmowers' cutting height, no tools needed. As a rule of thumb, it is recommended to cut maximum 1/3 of the grass' height. Therefore it is important to choose the correct height setting. The wider the range and the more pre-defined positions, the more precise the end result will be.

The lawnmowers' mulching function helps to maintain a healthy and green lawn. Mulch is a fine layer of fine cut grass that decomposes rapidly, putting nutrients back into the soil. It also protects your lawn from heat and draught, by retaining water more easily. Mulch gets made by re-circulating and re-cutting the grass clippings under the mowing deck, after which it gets forcibly returned to the lawn.

### BRUSHLESS MOTOR

### GET TO KNOW THIS PRODUCT

This cordless pressure washer from Dual Power is **ideal for use on the road**. The 20V pressure washer is equipped with a 6m long hose, which can draw water from remote sources, such as a lake, well or pond. Therefore, this is Dual Power tool is perfectly suited for cleaning road or mountain bikes after a muddy ride. It can also come in handy on holiday to give the car a quick rinse. The portable pressure washer can be attached to a regular tap as well, by using a standard garden hose.

The Dual Power pressure washer features a powerful **brushless motor**. It is more durable, extends the battery's autonomy and requires less maintenance. The washer has a flow rate of 170 litres per hour with a maximum water pressure of 25 bar. Switching between low and high pressure is easy.

The 5-in-1 pressure nozzle features **5 different spraying patterns**, ranging from a regular water jet to a powerful precision jet. Extra clean results can be achieved thanks to the detergent tank. It can be attached easily and provides perfectly clean results.
