Hoy hemos estado en la Universidad de Zaragoza junto con nuestros amigos de AraWorks en la primera jornada de #MANUFACTURING4.0 donde hemos enseñado las posibilidades que ofrece la nueva revolución industrial. También hemos podido enseñar las capacidades de BLACKBELT 3D y materiales colorFabb combinados con SOLIDWORKS en nuestro proceso productivo. Mañana más en Madrid!

**FORMATION** 

#design #blackbelt3D #colorfabb #3Dprinting #solidworks #araworks #MANUFACTURING4.0

Different formative acctions have been done during last year. All this formation is based in 3d desing and 3D printing, giving studients the possibility of increase their capabilities in this new industrial revolution.

**RSC** 

UNIQ

With regard to RSC (Corporate Social Responsibility), Uniqo Custom Engineering obtained the RSA seal of the Government of Aragon in 2017. This certification, which is renewed annually, is a way of valuing the principles of social responsibility of a company or organisation, and adapting, as a community, to compliance with the Sustainable Development Objectives (SDOs) of the United Nations.

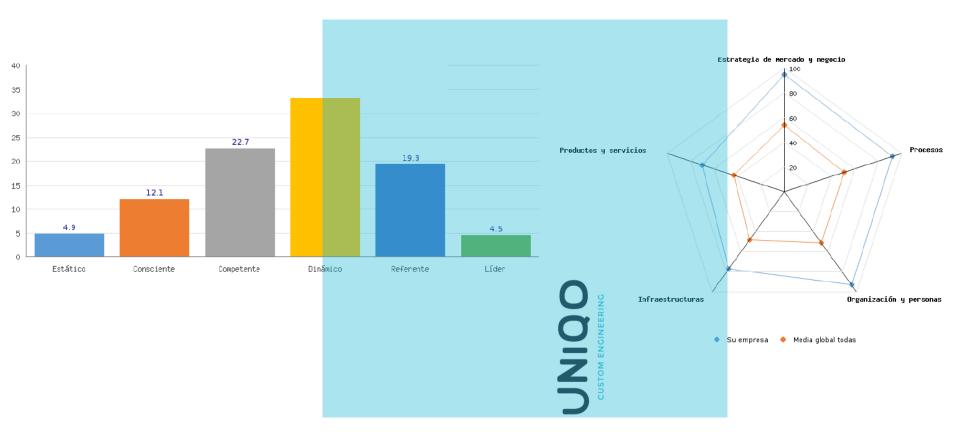

CUSTOM ENGINEERING

#### **INDUSTRY 4.0 MANUFACTURING**

The Ministry of Economy, Industry and Competitiveness of Spain, through the Industry Connected 4.0 Initiative, considers Uniqo Custom Engineering, within digital maturity, an organization as LEADER.

Comparison of maturity for companies of the same activity:

In relation to the average digital maturity of all the companies registered in this same sector of activity.

#### INDUSTRY 4.0 MANUFACTURING

**Uniqo Custom Engineering**, is recognized by the Government of Aragon as one of the enablers of Industry 4.0 in Aragon.

Digital enablers are understood as the set of Aragón Industria 4.0 Portal de Apoyo al despliegue de la Industria 4.0 en las empresas de Aragón technologies that make the new industry possible. In our case the concept of the enabler will be linked more to the R & D groups, both public and private that offer solutions and technological applications in order to the industrial and conventional companies advance in the implantation of digital processes.

In Aragon there is a very important base of organizations and companies (in which we belong) specialized in the key technologies for the digitalization of the industry.
