

# UVS 56

UVS 56 is a transportable screening system, designed with the highest level of efficiency. The screening takes place on two screening levels, and on three sections, ensuring a quick and efficient classification of the different materials.

ELECTRIC DRIVE

## 1 Screen

Model: CVV056  
Surface: mm 1300 x 4300  
Screen decks: 2

## 2 Main conveyor

Width: mm 800

## 3 Finesize conveyor

Width: mm 800

## 4 Midsize conveyor

Width: mm 800

## 5 Oversize conveyor

Width: mm 800

## 6 Electric drive

Supply: 40 kW

## FEATURES

- Ability to process wet materials
- High wear resistance
- Low emissions and acoustic pollution

## OPTIONS

- Feeding hopper
- GPS
- Belt scale
